

BELGIUM:
Are refused:

- Tanks and vessels not complying with the acceptance conditions (see table below)
- KGA (small hazardous waste)
- Radioactive material
- Ammunition, except **EMPTY** casings and **EMPTY** shells if **delivered separately**
- Gas cylinders, gas bottles and all other explosive devices with cap
- Metal working machines (lathes, milling machines, ...) that have not been stripped of their system fluids (oil, cooling fluid, ...)
- Engines of cars and trucks that have not been depolluted and, in general, all non-depolluted material containing liquids (e.g. forklift truck)
- Transformers (except transformers that have been de-oiled and provided they have only contained mineral oil, so no PCBs, with analyses)
- WEEE (Waste Electrical and Electronic Equipment) that has not been depolluted (e.g. presence of a condenser containing PCB or PCT, coolant gas, ...), except as provided for in the permit – site-specific (**delivered separately**)
- All batteries (lithium, alkaline, ...) **except** :
 - Batteries in WEEE to be depolluted (**WEEE delivered separately**)
 - Batteries in end-of-life vehicles to be depolluted (licensed depollution centre)
 - Lead-acid batteries and batteries in forklift truck **delivered separately**
- Material containing more than 50 ppm PCBs
- Self-combustible /self-igniting powders/products (e.g. magnesium, aluminium powder, ...)
- Products containing asbestos and/or ceramic fibres
- Unopened fireboxes

<u>Fined¹</u>	Belgium
Batteries in material to be shredded/cut/pressed: Lithium batteries \geq 10 cm Waste other than metals:	€ 50/battery € 50/battery Deduction of the estimated quantity at the reception (€ 140/t)
Tyres in material to be shredded:	20 kg/car tyre 40 kg/van tyre 100 kg/truck tyre 75 kg/small tractor tyre 150 kg/large tractor tyre 200 kg/wheel loader tyre
Spray cans present in the turnings:	€ 50/spray can
If gas bottles with cap are nevertheless found in the scrap:	
Gas bottle butane/propane	€ 12,50/bottle
Oxygen bottle	€ 60/bottle
Acetylene bottle	€ 200/bottle
Non-identifiable bottle	€ 500/bottle

¹ For your information, the fines can be considered on a case-by-case basis.

FRANCE:
Are refused:

- Tanks and vessels not complying with the acceptance conditions (see table below)
- KGA (small hazardous waste)
- Radioactive material
- Ammunition, except **EMPTY** casings and **EMPTY** shells if **delivered separately**
- Gas cylinders, gas bottles and all other explosive devices with cap
- Metal working machines (lathes, milling machines, ...) that have not been stripped of their system fluids (oil, cooling fluid, ...)
- Engins of cars and trucks that have not been depolluted and, in general, all non-depolluted material (except end-of-life vehicles arriving at an authorised centre) containing liquids (e.g. forklift truck)
- Transformers (except transformers that have been de-oiled and provided they have only contained mineral oil, so no PCBs, with analyses)
- WEEE (Waste Electrical and Electronic Equipment) that has not been depolluted containing coolant gas
- All batteries (lithium, alkaline, ...) **except** :
 - Batteries in WEEE to be depolluted (**WEEE delivered separately** in the context of contracts with eco-bodies)
 - Batteries in end-of-life vehicles to be depolluted (licensed depollution centre)
 - Lead acid batteries and batteries in forklift truck **delivered separately**
- Material containing more than 50 ppm PCBs
- Self-combustible /self-igniting powders/products (e.g. magnesium, aluminium powder, ...)
- Products containing asbestos and/or ceramic fibres
- Unopened fireboxes
- End-of-life vehicles whose administrative situation gives rise to an objection or right of pledge
- The parts of end-of-life vehicles usually bearing a chassis number or an end-of-life vehicle cut in two, without proof of ownership within the meaning of article R322-4 and/or R322-9 of the Highway Code (registration certificate or, failing that, an official document proving that the registration certificate cannot be issued, or proof of ownership of the vehicle)
- The end-of-life vehicles without a complete administrative file (registration certificate and possibly multiple transfers or, if this is not the case, either an official document proving that the registration certificate cannot be issued, or proof of ownership of the vehicle)
- All other prohibited materials, as defined by the *Arrêté préfectoral*.

ACCEPTANCE CONDITIONS FOR TANKS

ACCEPTANCE CONDITIONS FOR TANKS				
	Types of tanks, by size			
	0 - 1000 litres	shorter than 8.5 metres diameter smaller than 2.5 metres not excessive wall thickness	longer than 8.5 metres diameter bigger than 2.5 metres thick-walled tanks	
Processing:	Kondirator - Zerdirator	Scrap shear		to be burnt
Different products	Safety, environmental and quality measures			
diesel, gas oil, fuel oil, oil	<ul style="list-style-type: none"> - manholes open - lids must be removed - pipes and plugs must be removed - vessels and pots must be cleaned - tank must be EMPTY and DRY - mandatory information by the supplier 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning (specialised firm) 	
fire hazard				
no explosion hazard				
petrol, kerosene	<ul style="list-style-type: none"> - manholes open - pipes and plugs must be removed - tank must be EMPTY and DRY - mandatory information by the supplier 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning - certificate of degassing + date + hour + term - delivery Monday to Thursday, and not the day before public and annual holidays 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning (specialised firm) - certificate of degassing + date + hour + term - delivery Monday to Thursday, and not the day before public and annual holidays 	
fire hazard				
explosion hazard (vapour formation)

 version: 2.0

	0 - 1000 litres	shorter than 8.5 metres diameter smaller than 2.5 metres not excessive wall thickness	longer than 8.5 metres diameter bigger than 2.5 metres thick-walled tanks
Processing:	Kondirator - Zerdinator	Scrap shear	to be burnt
Different products	Safety, environmental and quality measures		
gas, LPG, propane, butane	<ul style="list-style-type: none"> - manholes open - pipes and plugs must be removed - tank must be EMPTY and DRY - mandatory information by the supplier 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning - certificate of degassing + date + hour + term - delivery Monday to Thursday, and not the day before public and annual holidays 	<ul style="list-style-type: none"> - manholes open or a hole of 50 cm (for lifting with crane) - tank must be EMPTY and DRY - mandatory information by the supplier - certificate of cleaning (specialised firm) - certificate of degassing+ date+ hour+ term - delivery Monday to Thursday, and not the day before public and annual holidays
chemical products	<ul style="list-style-type: none"> - must be agreed in advance (weighbridge + foreman + prevention advisor) - full provision of information - submission of safety data sheets of the product - consultation of a specialised cleaning firm is recommended 		

- GENERAL REQUIREMENTS FOR TANKS:**
- ALL TANKS MUST BE EMPTY (so no residue or liquids)
 - ALL TANKS MUST BE OPEN FOR INSPECTION
 - ALL TANKS must be 100% FREE OF EXPLOSION HAZARDS (IF NECESSARY, CERTIFICATE OF DEGASSING)
 - Dirt and insulation material on the tanks = large deduction
 - Beware of double-walled tanks: the intermediate liquid must be removed, or tank will be sent back
 - Tanks cannot be cleaned at our yard

TANKS THAT HAVE BEEN EXTREMELY THOROUGHLY CLEANED MAY BE DELIVERED FLATTENED IF THEY ARE NO MORE THAN 2 METRES WIDE AND NO MORE THAN 8 METRES LONG, AND THE MANHOLES MUST BE AT THE TOP!!!!

GENERAL SAFETY: NEVER ENTER A DEGASSED TANK: suffocation due to a lack of oxygen
